

Young Living Essential Oils and Equine Emergencies

Sara's talking about Young Living Essential Oils and Supplements for horses! Who the heck is Sara?

Sara Kenney has been working with animals most of her life. She groomed dogs professionally for twenty years and had a boarding kennel for the last 9 of those years. She started oiling animals about 17 years ago exclusively with Young Living's Therapeutic Grade Essential Oils and saw consistent results unlike anything she's ever worked with and she had studied natural medicine since 1988. Not all oils are made the same, legally they only have to have 5% of an essential oil in them the rest can be synthetic fragrances and still be labeled pure and natural. Young Living oils are very different and Sara has used these oils extensively on hundreds of horses, and dogs, a few cows, a handful of goats, a couple of alpacas, cats, fish, birds including chickens and ducks, one wild fawn and one elk calf. Sara has traveled in the US and Canada to teach the use of oils on animals, has been in an instructional DVD and written a book.

This is Riley and his knee was so swollen with Arthritis the vet suggested he be 'put down' Riley's family had other ideas and an oiling session was called in! We used Sacred Frankincense, Wintergreen, Copiaba and Peppermint for starters to assist in diminishing the pain and inflammation. His family continued oiling for 2 weeks and the swelling improved dramatically going down by at least half. He was no longer limping and he was again being ridden to do his job of sorting cattle. He wasn't stumbling or tripping his family will kept oiling the leg and we expected to see continued improvement... The rest of the story... Riley did very well and enjoyed a busy summer, Last I heard he is now retired from cattle work but he is alive and well!

What to Keep in your Equine Emergency Bucket

Stethoscope
Scissors, Tweezers, Medical Clamps,
Metal Cutter/Pliers
Gauze
Rasp, Hoof Knife and Hoof Pick
Kitchen Baster
Halter and Lead rope
Vet Wrap
Large syringe
Small/medium syringes w/wo needles
Bottle Distilled Water
Small Stainless Steel Dish
Digital Thermometer/Plastic Covers
Animal Scents Ointment-wounds
Bottle of Detoxzyme -
Digestive Enzymes, colic
Peppermint -pain, colic, founder
DiGize -digestion, colic

Thieves Spray -foaling um-bilical cord, antiviral, antibacterial
Thieves -infection, immune system
Thieves Household Cleaner-Cleansing for wounds
Longevity -immune system, malignant growths
RC- respiratory system
Peace and Calming- relaxation, peace
Melrose- antiseptic, antibacterial, infection
Idaho Balsm Fir- pain and depression
Helicrysum-bleeding, pain
Lavender- wound cleansing, tissue regeneration

PanAway- pain
Valor- bone and joint pain, structural realignment
Copaiba-Inflammation, layered on last it strengthens all oils
Ortho Sport-pain, sprains, wounds
V-6, Coconut or Olive Oil- diluting oils internally and externally
